

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

CATALOGUE

OF

AMHERST COLLEGE

LIBRARY.

AMHERST:
PRINTED BY WILLIAM FAXON.
1855.

P R E F A C E .

THE Library of Amherst College was commenced in 1821, the same year that the College went into operation. It however numbered very few books previous to 1832, in which year, about two thousand standard works in literature and science were purchased in London and Paris, by Professor Hovey, with money raised by general subscription among the friends of the College. From that time the Library gradually increased to 1850, when it numbered about six thousand volumes. During that year, the room in the Chapel devoted to the Library having become too small to accommodate the books, a subscription was started for the purpose of procuring funds for the erection of a new library building, and the purchase of such books as the necessities of both Officers and Students seemed imperatively to demand. With the twenty thousand dollars realized from this subscription, a new library building was erected in 1853, and such additions made to the Library, that, with other donations, the number of volumes which it now contains, varies not far from twelve thousand.

The first and only Catalogue ever published, was an octavo pamphlet of thirty pages, issued in September, 1827. The present Catalogue, prepared on the plan of that of the Public Library of the City of Boston, makes no claim to any bibliographical merit. It is simply an alphabetical list of authors, so arranged that it may be readily seen what books belong to the Library, and where they are to be found. In the hurry of preparing and carrying through the press a work of this kind, where so many figures and names occur, perfect correctness is of difficult attainment. The types being often small, or standing out alone, are very liable to be broken off, especially the periods and figures. No important error has as yet been noticed, and it is hoped that few

have occurred. Deficiencies in almost every department of the Library, particularly those of belles-lettres and history, will be apparent to all. A good beginning however has been made, a substantial building erected, and the shelves are ready to receive the donations which a liberal public may be willing to bestow.

AMHERST COLLEGE,
August, 1855.

ALPHABETICAL CATALOGUE.

The letters n. d. following a title indicate that no date is printed with the volume.
